

## AFRL scientist presents keynote address

*by Francis L. Crumb, Information Directorate*

ROME, N.Y. — William K. McQuay of the Air Force Research Laboratory's Information Directorate was named to present the keynote address to the Secure Knowledge Management Workshop scheduled Sept. 23-24 in Buffalo, N.Y.

The 2004 workshop is co-sponsored by National Science Foundation, National Security Agency, State University of New York in Buffalo, and AFRL. Dr. Kevin Kwiat, a senior computer engineer in the directorate's Information Grid Division at the Rome Research Site, is a program committee chairman for the workshop.

Mr. McQuay, of the directorate's Information Systems Division at Wright-Patterson Air Force Base, Ohio, chairs an Integrated Product Team which is developing and implementing information and simulation technologies to create a Collaborative Enterprise Environment. His address entitled, "Collaborative Secure Knowledge Management," discussed AFRL's involvement in the areas of secure knowledge discovery, creation, management, and use for enhanced decision support.

Mr. McQuay led an AFRL team that was named winner of the 2003 Federal Laboratory Consortium Northeast Region Award for Excellence in Technology Transfer. He was also named an AFRL Fellow in 2003. @
